How to deal with a noisy Kenmore upright freezer. Excessive frost on the evaporator can interfere with the rotating evaporator fan blade, causing a loud buzzing noise inside the freezer compartment. If you hear buzzing and the noise gets louder when you open the freezer door (indicating the noise is coming from inside the cabinet), check for excessive frost inside the freezer. If you find ...

If frost is building up in the freezer, check first for a break in the door gasket that could be letting in warm, moist air. If the gasket seems sound, a malfunction somewhere in the automatic defrost system could be the culprit. A failed defrost timer or a bad electronic control board may not initiate the automatic defrost cycle, causing excessive frost buildup on the back wall inside the ...

Are these appliances frost-free? Unlike refrigerator/freezer combinations, most freezers require manual defrosting. Upright models are more likely to offer the frost-free option. Before selecting, be sure to check the product's specifications. Most come with defrost drains to make cleaning easier. Do these appliances use electricity or gas?

Frost-free Feature Not Working. If the frost-free feature fails, it will cause a buildup of frost around the evaporator coils in the freezer. This causes a malfunctioning of the evaporator fan that blows cold air around. The fan can also be damaged if it hits the frost. You can tell when a fan blade gets damaged by the loud noise coming from the now unbalanced fan. 4. Faulty
